Education

UNIVERSITY BABES BOLYAI

COMPUTER SCIENCE

- Bachelors Degree

NATIONAL COLLEGE PETRU RARES

MATHEMATICS AND INFORMATICS

- Baccalaureate Diploma

Skills

CORE STACK

Frontend:

- **Languages:** HTML, CSS, JavaScript, TypeScript
- **Frameworks/Libraries:** Angular

Backend:

- **Languages:** Java (8, 11, 17, 21)
- **Frameworks:** Spring Boot, Quarkus

DATABASES & CLOUD

- SQL (Oracle, MySQL, PostgreSQL)
- Database design, query optimization, indexing
- AWS (EC2, S3, RDS, IAM, Networking), Docker

TOOLS & OTHERS

- Git • Postman • $\LaTeX$ • CI/CD basics

KNOWN LANGUAGES

- Fluent: English, Romanian
- Working knowledge: German

Soft Skills

- Problem Solving Debugging
- System Design Awareness
- Full-Stack Integration

Interests

CODING COMPETITIONS

Participate regularly in online and onsite contests solving algorithmic and data-structure challenges.

TECHNOLOGY

Built computers and devices while staying updated on evolving technology.

FITNESS

Passionate about health and fitness, following a disciplined routine.

Experience

IBM

FULL STACK DEVELOPER MID

Responsible for full-stack development and optimization in a cross-functional team in the automotive industry.

- Upgraded Java 8 to 11 and Payara 4 to 5, modernizing dependencies, fixing broken modules, and enabling JUnit 5 testing. Improved app security by updating vulnerable libraries and unlocking new features.
- Developed an automated Word document generation API (Apache POI) to replace manual reporting, reducing report preparation time by 50% and enabling upper management to showcase testing results efficiently.
- Optimized SQL queries for core data export functionality, eliminating redundant processing and reducing wait times from several minutes to seconds, improving performance for all app users.
- Enhanced the front-end landing page with Angular, implementing a feature to fetch and display dynamic client data in production, improving visual clarity and usability for end-users.

LIFE IS HARD

FULL STACK DEVELOPER INTERN

Responsible for learning and development in the financial industry.

- Contributed to front-end Vue features and internal Laravel tools; deployed code to production.

PRIVATE TUTOR

C++ & C INSTRUCTOR

Provide personalized tutoring and exam preparation for children and computer science students.

- Provided personalized C++ and C tutoring, preparing students for exams and tracking progress to improve performance.

Recent Personal Projects

LANDMASS PROCEDURAL GENERATION

- Developed a **procedural landmass generation system** in **Unity** for my bachelor's thesis, implementing **Perlin noise** and custom mathematical algorithms to create dynamic, endlessly varied terrain, providing unique landscapes for users.

Tech Stack: Unity Engine, C#, Perlin Noise, Custom Math Libraries

WORKOUT TRACKER (GYMLOG)

- Designed and deployed a **full-stack web app** for workout tracking with secure user authentication (encrypted login and OAuth2), CRUD-based workout management, and cross-device responsive UI. Developed all components — front-end, back-end, database, and deployment — solving real-world usability challenges not addressed by existing apps.
- Deployed on **AWS EC2** and tested with a small user group, demonstrating practical time-saving benefits over manual tracking methods.

Tech Stack: Spring Boot, Thymeleaf, MySQL, BCrypt Encryption, OAuth2 (Google/Facebook), Bootstrap, AWS EC2 instance
